ATTACHMENT TO PRODUCT DRAWING WORKSHEET

1. Drawings shall have an application block listing the drawing number of the next assembly and the Data List number in the "Next Assembly" and "Used On" columns respectively.
2. Title block and drawing format shall be approved by NSWCPHD/ DET LOUISVILLE CODE 4K10.
3. Metric dimensioning shall not be used.
4. All new drawings shall contain the notes "INTERPRET DWG IAW ASME Y14.100M-1998" and "DIMENSIONING AND TOLERANCING IAW ANSI Y14.5M-1982" or other versions as applied.
5. Drawings shall specify identification marking of parts and assemblies using MIL-STD-130 as guidance. Location, size and marking method shall be specified on drawing. Whenever possible, the identification marking shall be located on the item so that visual observation is possible in the assembled condition.
6. Drawings shall be zoned in accordance with ANSI Y14.1-1980.
7. Third angle orthographic projection shall be used on all drawings.
8. Except where specifically noted on the drawings, dimensions and tolerances of all parts and assemblies shall ensure complete interchangeability of like parts without selection or fitting.
9. When a circuit shown on a wiring, piping or logic diagram or on a schematic is continued on another sheet/drawing, it shall be referenced by zoning. It shall contain the zone and sheet number when the circuit is continued on another sheet of the same drawing; the applicable drawing number shall be added when the circuit is continued on another drawing.
10. If Printed wiring master pattern drawings contain stable based master patterns, they shall contain the following note in lieu of that required by ASME Y14.24M-1989, para 11.3.3.(a). "A STABLE BASE MASTER PATTERN SHALL BE USED TO PRODUCE THE PRINTED WIRING BOARD. ALL OTHER DWG COPIES ARE FOR INFORMATION."
11. Drawings specifying screw/pipe threads shall identify thread designations in accordance with ANSI Y14.6 1978 and specify the controlling thread requirement per ANSI B1/B2 series of American National Standard, Military Specification or ISO Standard number for the type of thread depicted on the drawing.
12. The parts list of inseparable assembly drawings shall not contain cross reference information related to separate contractor format detail part drawings.

13. Revisions to existing drawings shall be made according to ASME Y14.35M-1997. When revising existing drawings, the drafting practices that result in the most cost effective drawing change shall be used providing such practices ensure consistent drawing interpretation with the unrevised portions of the drawing. The revision status shall be identified on each sheet being revised in the revision letter block located in the title block or a revision block located in the upper right corner of the sheet. Multi-sheet drawings shall also have the revision status of all sheets identified on sheet 1 in the revision status of sheets block. Missing blocks shall be added in accordance with paragraph 24 of this attachment.
14. Altered item drawings shall be in accordance with Figures 11 and 12 of ASME Y14.24M-1989, para 6.1, except that the Figure 11 concept (page 29) may be used for standard parts (MS, AN, etc.) and vendor items.
15. All revised drawings shall contain the notes “INTERPRET DWG IAW (See Note 1)” and “DIMENSIONING AND TOLERANCING IAW (See Note 2)”.

Note 1: Insert the applicable engineering drawing practices standard. Example ASME Y14.100M-1998

Note 2: Insert the applicable dimensioning and tolerancing standard. Example ANSI Y14.5M-1982

The selection of the engineering drafting practice and dimension and tolerance standard shall be selected based on the requirements under which the drawing(s) were prepared.

16. Drawings shall specify test requirements sufficient to assure functional operation and adjustment for all assemblies (e.g., circuit board assemblies, gear trains, waveguide sections). Test requirements may be listed directly on the drawing or may reference an approved Government/industry specification or standard. Unless approved by the procuring activity, test(s) shall not be dependent upon related assemblies, associated equipment or special test sets.
  - a. The drawing number assigned to the Test Requirement shall be the same as the drawing number assigned to the corresponding assembly drawing, prefixed with the letters “TR”.
  - b. The “TR” document shall be listed on the appropriate Assembly Data List (DL).
  - c. The following note shall be entered on the corresponding assembly drawing: “SEE TR XXXXXXX FOR TEST REQUIREMENTS”.
  - d. The cover or title sheet shall contain a statement describing the scope and purpose of the Test Specification.
  - e. Paragraph numbering is to be in accordance with MIL-STD-961, paragraph 4.13.
  - f. A Notice of Revision shall be prepared when an authenticated “TR” is revised.

17. All bulk material (paint, weld rod, solder, grease, ink, etc.) shall be listed on the parts list. Plating and coating processes or the chemicals used in these processes shall not be listed.
18. The revision letter shall not be listed on Government specifications or standards (MIL, FED, DOD, MS, etc.) with the exception of where a specific paragraph is invoked from the particular specification or standard.
19. DELETED.
20. New drawings prepared as revised phototracings of existing drawings are acceptable if prepared in accordance with the engineering drawing practices and format of the previous existing master drawings. Drawings prepared as revised phototracings of existing drawings shall meet the clarity requirements for drawing masters as stated in this attachment. These drawings shall contain the notes detailed in Item 15.
21. General notes shall be located in the upper left corner of the drawing. They shall be numbered consecutively and downward starting with the number 1.
22. The addition of a suffix dash number to a drawing number shall be done only on a tabulated detail or tabulated assembly drawing.
23. Except for printed wiring board drawings, continuation sheets of multi-sheet drawings shall be the same size as the first sheet.
24. In accordance with ANSI-Y14.1-1980, each continuation sheet of a multi-sheet drawing shall have a revision letter block located in the title block or a revision block located in the upper right corner of the sheet. Sheet 1 of multi-sheet drawings shall also have a revision status of sheets block.
25. Only nationally recognized industry association or government standards shall be referenced on engineering drawings.
26. If find numbers are used on the field of the drawing for the purpose of cross-referencing to items on a parts list, the identification of the parts or subassemblies shall be itemized in a PL or in a table on the first sheet of the drawing.
27. Unless otherwise specified, the types of engineering drawings shall be as specified in ASME Y14.100M-1998, SECTION 4.1. Multidetail, detail assembly, roll size and photographic drawings are prohibited. Installation drawings shall be furnished in accordance with ASME Y14.24M-1989, section 5.
28. Source Control, Vendor Item and Selected Item drawings shall identify all replaceable items by vendor part number or the equivalent Military Standard/Military Specification.

29. On Source Control and Vendor Item Drawings, source of supply information shall include the manufacturer's name, CAGE Code and part number. For example:

XYZ COMPANY  
CAGE CODE 06129  
PART NO. PW609-6

30. All vendor or commercial items with the exception of microcircuits not developed at Government expense shall be selected and documented in the following order of precedence:
- (a) Nationally recognized Industry Standards
  - (b) Military Specifications/Standards
  - (c) Vendor Item Drawings
  - (d) Source Control Drawings
31. All microcircuits shall be selected and documented in the following order of precedence:
- (a) Nationally recognized Industry Standards
  - (b) Military Specifications/Standards
  - (c) Standardized Military Drawings
  - (d) Control Drawings.
32. A Data List (DL) shall be prepared at the top assembly level. Proposed DL shall require prior approval by Code 4K10. A DL shall also be prepared for an assembly which may be procured as an entity separate from the equipment which it is to be assembled. No DL's shall be prepared for inseparable assemblies or any parts that would be considered a single item (an item with attaching hardware etc.)
33. From Data Item Number B003 and WORKSHEET, block 1a: For **“Repro Copies”** or **Master Drawings; DIGITAL DATA**- New drawings shall be CADD files compatible with Pro-Engineering version 18 as a minimum or as mutually agreed to. **NON-DIGITAL DATA** - Original Drawings (Masters) on plastic sheet shall be in accordance with L-P-519, type I or II, class 2. Undimensioned drawings, printed wiring artwork, masters, production masters, and master pattern drawings shall be in accordance with MIL-D-5480, class 2 or L-P-519, type I or II class 1.
34. From Data Items B003 and WORKSHEET, block 1b: **DIGITAL DATA**(B003) – For **“Regular Copies”** submit files in Adobe Post Script format (.ps, .prn, or .eps). Media shall be CD-ROM or as otherwise mutually agreed to. Submit for review and after NAVSEA acceptance of drawings.
35. The revision level of the drawings shall be advanced when the drawing is placed under NAVSEA Revision Control.

ATTACHMENT 1 TO CONTRACT DATA REQUIREMENTS LIST  
EXHIBIT(A)

## GENERAL DD FORM 1423 GLOSSARY

(Addressee Listing begins on page 9)

A. The following information is keyed to and provides explanations for entries in blocks A through J of the DD 1423 Exhibit(s):

**Block A. CONTRACT LINE ITEM NO.**

The Contract Line Item Number (CLIN) that is associated with this Contract Data Requirements List (CDRL).

**Block B. EXHIBIT**

The exhibit identifier for this CDRL (see DFARS 204.7105 for exhibit identifier(s)).

**Block C. CATEGORY**

The appropriate block for Technical Data Package (TDP), Technical Manual (TM), or "Other" data (OTHER) will be identified. Types of data which comprise a TDP are defined in MIL-PRF-31000 and types of manuals included under the TM category are defined in DoDI 5000.2. "OTHER" data may be further categorized, such as Administrative Data, Provisioning Data, Configuration Data, etc., per the functional area assignments contained in DoD 5010.12-L, Acquisition Management Systems and Data Requirements Control List (AMSDL).

**Block D. SYSTEM/ITEM**

The System, Item, project designator or name, or title of services being acquired that the data will support.

**Block E. CONTRACT/PR NO.**

Enter the contract or Purchase Request (PR) number when known; if unknown, the Request for Proposal (RFP) number, or other appropriate designator.

**Block F. CONTRACTOR**

The contractor's name when known. Following the name, a slash ("/") and the contractor's Commercial and Government Entity (CAGE) code may be inserted.

(The next four items appear at the bottom of the form, i.e., after Blocks 1 through 16.)

**Block G. PREPARED BY**

Enter the name and signature or the CDRL preparer or the name of the activity responsible for preparation of CDRL. The signature of the preparer will be on the last page of the exhibit. All other pages will be initialed by the preparer.

**Block H. DATE**

The date the CDRL was prepared. (i.e. 98FEB27)

**Block I. APPROVED BY**

Enter the name and signature of the individual responsible for approving the CDRL. The approving official's signature will be on the last page of the exhibit. All other pages will be initialed by the approving official.

**Block J. DATE**

The date the CDRL was approved. (i.e. 98FEB27)

NOTE: Blocks G and I need only be signed on the last page of each CDRL exhibit when the preparer and the approving official are the same throughout the entire exhibit. All pages will contain the typed name and signed initials.

B. The following information is keyed to and provides explanations for entries in Blocks 1 through 15 of the DD Form 1423 Exhibit(s):

**Block 1. DATA ITEM NO.**

The 4-character Exhibit Line Item Number (ELIN). The first and/or second positions consist of the exhibit identifier, and the remaining positions are assigned sequentially. The letters "I" and "O" are not used. ELIN sequencing order can be found in DFARS 204.7105. ALL ELINs between the first and last ELIN will be accounted for in the exhibit.

**Block 2. TITLE OF DATA ITEM**

The exact title of the data Item Description (DID) cited in Block 4. When the ELIN is used to acquire technical manuals (TMs), a Technical Manual Contract Requirements (TMCR) document will be cited in Block 4, and the entry in Block 2 will be the title of the specific type of TM being acquired.

**Block 3. SUBTITLE**

Further identification of the data item to supplement the title, if required (optional entry).

**Block 4. AUTHORITY (DATA ACQUISITION DOCUMENT NO.)**

Enter the Data Item Description (DID) number that provides the format and content requirements for the data item listed in Block 2. When the DD Form 1423 is used to acquire militarized technical manuals, the specific number of the applicable military specification or standard which provides the data preparation, verification, and validation instructions shall be entered in this block. If a Technical Manual Contract Requirements (TMCRs) document is used to acquire militarized technical manuals, enter "See TMCR\_\_\_\_\_" in this block and attach the TMCR to the CDRL. The TMCR shall list the applicable military specifications or standards which provide the data preparation, verification, and validation instructions. It should be noted that DIDs DI-TMSS-80527 and DI-TMSS-80528 are the only authorized DIDs to be used when procuring commercial off-the-shelf (COTS) manuals. With the exception of a one-time DID, the document cited in this block (or listed in the TMCR, when used) must be one which has been cleared for listing in DoD 5010.12-L, Acquisition Management Systems and Data Requirements Control List (AMSDL).

**Block 5. CONTRACT REFERENCE**

The specific paragraph number of the applicable contractual document which contains the tasking that generates a requirement for the data item. Normally, this will be a Statement Of Work (SOW) paragraph.

**Block 6. REQUIRING OFFICE**

Enter the technical office having responsibility for ensuring the technical adequacy of the data. When data requires approval, this office is responsible for determining if the data submitted should be approved as submitted or revised to meet contract requirements.

**Block 7. DD 250 REQUIREMENT**

Enter the applicable code, per Table 1, designating the requirements for inspection and acceptance of the data. The DD Form 250 shall be delivered to the first addressee in Block 14, unless otherwise indicated in Block 16.

TABLE 1. DATA INSPECTION AND ACCEPTANCE CODES

<u>DD FORM 250 CODE</u>	<u>INSPECTION</u>	<u>ACCEPTANCE</u>
SS	(1)*	(2)*
DD	(3)	(4)
SD	(1)*	(4)
DS	(3)	(5)*
LT**	(6)	(7)
NO**	(8)	(8)
XX	(9)	(9)

(1) Inspection at source.

(2) Acceptance at source.

(3) No inspection performed at source. Final inspection performed at destination.

- (4) Acceptance at destination.
- (5) Acceptance at source. Acceptance based on written approval from the contracting officer.
- (6) Letter of transmittal only. LT should not be used when inspection is required. The data is sent by the contractor directly to the personnel listed in Block 14 of the DD Form 1423. LT is used when the contracting agency requires a record of delivery but does not desire to have a DD Form 250 for each and every piece of data developed by the contractor. The only other authorized use of LT is the special case where the contracting agency does not desire to have separate DD Forms 250 but desires to have a Government quality assurance (QA) representative perform inspection. The Government QA representative shall be listed on the distribution in Block 14 and requested to provide comments via the QA letter of instruction. Also, when the local Contract Administration Office (CAO) is required to perform inspection of a letter of transmittal, Block 16 will indicate this requirement. In all cases where LT is used, a copy of the letter of transmittal should be provided to the CAO for information and appropriate use in administration of the contract.
- (7) As specified in Block 16 of the DD Form 1423.
- (8) No inspection or acceptance required. No DD Form 250 or letter of transmittal required.
- (9) Inspection and acceptance requirements specified elsewhere in the contract.

\* Source indicates contractor facility

\*\* These codes are not authorized for the data comprising final delivery of Technical Data Packages or for Technical Manuals. (LT may, however, be used for delivery of preliminary TDP's or TM's.)

#### **Block 8. APPROVAL CODE**

Items of critical data requiring specific advanced written approval prior to distribution of the final data item should be identified by placing an "A" in this field. Data items that are elements of TDP's and TM's shall always require an "A" in this field. The responsible reviewing activity will normally be the Requiring Office in Block 6. If this is not the case, the reviewing activity will be identified as such in Block 16. When the data item requires submission of a draft document prior to publication of a final document, Block 16 of the DD Form 1423 will show the length of time required for the government approval/disapproval and subsequent turn-around for the contractor to resubmit the data after the Government approval/ disapproval has been issued. These response times are contractual commitments and if the Government or contractor cannot meet these commitments, each is obligated to notify the other of the revised length of time required to respond. Block 16 will also indicate the extent of the approval requirements, e.g., approval of technical content and/or format. If approval of the data item is not required, insert "N/A"(not applicable) in Block 8.

#### **Block 9. DISTRIBUTION STATEMENT REQUIRED**

Enter the code letter (e.g., A, B, C, D, E, F, or X) corresponding to the distribution statement to be marked on the data item by the contractor, in accordance with DoDD 5230.24, "Distribution Statements on Technical Documents." Blocks 16 of the ELIN will reflect the appropriate statement and will include the reason, date of determination, and controlling DoD office. If the appropriate statement is not known, or if it may vary among specific submissions under this item, "BLK16" will be entered in this block and explanatory information will be provided in Block 16.

#### **Block 10. FREQUENCY**

The frequency of data submittal. Entries in this block are explained in Table 2. If the data is of a recurring type, it is to be submitted at the end of the reporting period established in this block unless otherwise indicated in Block 16.

TABLE 2 DATA SUBMITTAL FREQUENCY CODES

<u>CODE</u>	<u>FREQUENCY</u>
ANNLY	Annually
ASGEN*	As generated
ASREQ*	As required
BI-MO	Every two months
BI-WE	Every two weeks
DAILY	Daily
DFDEL	Deferred delivery (See DFARS 252.227-7026)
MTHLY	Monthly
ONE/P	One Preliminary
ONE/R	One time with revisions
QRTLY	Quarterly
R/ASR*	Revisions as required
SEMIA	Every six Months
WEKLY	Weekly
XTIME	Multiple separate submittals (1TIME, 2TIME ... 9TIME, etc.) (A number must always be inserted in place "X". Does not include draft submissions)
BLK16*	Requirement is fully described in Block 16. Used in lieu of other codes where such are inadequate to define requirement, or used in addition to other codes requiring amplifications in Block 16.

\* The ELINS citing these codes will have an additional explanation in Block 16 to provide the contractor with guidance necessary to accurately price the deliverable data item.

#### Block 11. AS OF DATE

Date for cutting off collection of the data. If the data is submitted multiple times, a numeral will be entered in this block to indicate the number of calendar days prior to the end of the reporting period, established in Block 10, that data collection will be cut off. For example, "15" would place the "as of" date for the data at 15 days before the end of the month, quarter, or year, depending on the frequency established in Block 10; a "0" would place the "as of" date at the end of each month, quarter, etc. If the data is submitted only once, the "as of" date will be as follows: year/month/day, e.g., 98FEB27. If an "as of" date is not applicable, an entry of "N/A" will be made in this block.

#### Block 12. DATE OF FIRST SUBMISSION

The due date for the initial data submission. This is normally the postage date or date of data is delivered to the ACO, entered as year/month/date (e.g., 98FEB27) or keyed to a specific event or milestone, using a code from Table 3.

**NOTE:** No classified dates are to be cited in the CDRL.

TABLE 3 DATA SUBMISSION CODES

<u>CODE</u>	<u>DEFINITION</u>
ASGEN*	As generated
ASREQ*	As required
DFDEL*	Deferred delivery
NLT	No later than
EOC	End of contract
EOM	End of month
EOQ	End of quarter
XDAC**	Days after contract award
XDACM**	Days after contract modifications
XDARP**	Days after reporting period
XDARC**	Days after receipt of comments

N00024-00-R-5239

XDATC\*\*  
XDPTT\*\*  
XDADO\*\*  
BLK16

NOS 1745-5A43-00

Days after test completion  
Days prior to test  
Days after delivery order  
Used to indicate requirement is fully described in Block 16. Used in lieu of other codes where such are inadequate to define requirement, or used in addition to other codes requiring amplification in Block 16.

06/23/00

\* The ELINs citing these codes will have in Block 16 additional specific instructions relative to data submissions.

\*\* The "X" is assigned a value indicating the number of days, e.g., 30DAC.

**Block 13. DATE OF SUBSEQUENT SUBMISSION**

The due date(s) for subsequent data submission(s), if data is to be submitted more than once. If submittal is constrained by a specific event or milestone, the constraint will be given using a code from Table 3.

**NOTE:** No classified dates are to be cited in the CDRL.

**Block 14. DISTRIBUTION**

The addressees and the number of draft copies and final copies (regular and reproducible) to be provided to each. DoD component designator and office symbols/codes may be used; however, an explanation of these will be provided in the Addressee Listing. The first addressee will be the acceptance activity for the data if acceptance by DD 250 is to be accomplished at destination (see Block 7). When reproducible copies (e.g., magnetic tape, vellum, negative, etc.) are required, an explanation will be provided to the Government or associated contractors, an explanation will be given in Block 16. If deferred delivery is required, "DFDEL" will be entered in this block and amplification will be given in Block 16. DO NOT insert classified locations. Block 14 will provide for the following particulars:

(a) The DOD component designator and office symbols and/or codes, or unit identification codes (UICs) may be used in block 14a; However, an explanation of the entries will be provided in the addressee listing on page 9.

(b) In block 14b, insert the number of copies to be delivered to each addressee adjacent to that addressee in each of the three columns. Unused columns will have a number entry of "0".

(c) When the data item requires an advance written approval (indicated by an "A" in block 8), draft copies are required for approval before publication/release of the final document. Enter draft quantities in block 14b and an explanation in block 16 (if required, e.g. "Submit draft copy for approval 90DAC award. Submit final copies 30 days after government approval of the draft.")

(d) In block 16, include digital media details and constraints (when appropriate), such as source document requirements of tape density per inch, tape size, record and header formats, file headers, files constructs and end system environment (such as DEC VAX 6000 system, Compuvision CADDS 4X system, Pro-Engineer, Auto Cadd, etc).

(e) In block 16, include non-digital media details and constraints, such as source document requirements (e.g. MIL-D-5840 or MIL-M-38761/1) type and class of microfilm, paper, vellum, etc., as necessary to fully describe media constraints. (NOTE: Reproducible copies are master /first generation documents capable of making successive generations of high quality resolution copies. Reproduced copies are subsequent generation copies of lower resolution made from first generation masters.)

(f) If deferred delivery is required, so indicate by placing "DFDEL" in block 14 and provide specific instructions on disposition of "masters" in block 16.

Procedures for distribution to classified locations should be coordinated among the user, acquisition agent and the data manager.

**Block 15. TOTAL**

Total number of draft and final (regular/reproducible) copies required by block 14.

**Block 16. REMARKS**

Contains all pertinent data information not specified elsewhere on this DD Form 1423 and any amplification of other blocks on this form (e.g., DID tailoring, use of contractor format, approval criteria and authority, inspection and acceptance clarification, distribution statements, specific submission instructions, explanation of reproducible copy and delivery requirements, desired medium for delivery of the data item, etc.)

C. The following instructions apply to completion of Blocks 17 and 18 by contractor personnel:

**Block 17. PRICE GROUP**

Specify the appropriate price group from one of the following groups of effort in developing estimated prices for each data item listed on the DD Form 1423.

Group I Definition \_ Date which is not otherwise essential to the contractor's performance of the primary contracted effort (production, development, testing, and administration) by which is required by DD Form 1423.

Estimated Price - Costs to be included under Group I are those applicable to preparing and assembling the data item in conformance with Government requirements, and the administrative and other expenses related to reproducing and delivering such data items to the Government.

Group II Definition - Data which is essential to the performance of the primary contracted effort but the contractor is required to preform additional work to conform to Government requirements with regard to depth of content, format, frequency of submittal, preparation, control, or quality of the data item.

Estimated Price - Costs to be included under Group II are those incurred over and above the cost of the essential data item without conforming to Government requirements, and the administrative and other expenses related to reproducing and delivering such data item to the Government.

Group III Definition - Data which the contractor must develop for his internal use in performance of the primary contracted effort and which does not require any substantial change to conform to Government requirements with regard to depth of content, format, frequency of submittal, preparation, control, and quality of the data item.

Estimated Price - Costs to be included under Group III are the administrative and other expenses related to reproducing and delivering such data item to the Government.

Group IV Definition - Data which is developed by the contractor as part of his normal operating procedures and his effort in supplying this data to the Government is minimal.

Estimated Price \_ Group IV items should normally be shown on the DD 1423 at no cost.

**Block 18. ESTIMATED TOTAL PRICE**

For each data item, enter an amount equal to that portion of the total price which is estimated to be attributable to the production or development for the Government of that item of data. These estimated data prices shall be developed only from those costs which will be incurred as a direct result of the requirement to supply the data, over and above those costs which would otherwise be incurred in performance of the contract if no data were required. The entry "N/C" for "no charge" will be acceptable. The estimated price shall not include any amount for rights in data. The Government's right to use the data shall be governed by the pertinent provisions of the contract.
